Agresso Package

Monitor Agresso Processes

Ensure business continuity and system performance
Track the key internal processes of your Agresso system.

Job Execution Monitoring
Track Agresso jobs like agrscheduler, agrexport, and agrimport. Get notified of failures or delays instantly.

Scheduler Oversight
Monitor the Agresso job scheduler to ensure all queued tasks are processed on

Ready Made Scripts

Deploy specialized monitoring instantly
With no need to develop custom jobs or routines for Agresso.

Built-In Agresso Logic
Preconfigured jobs track Agresso-specific tables and processes, reducing i mplementation time.

No Custom Scripting Needed
Everything is included—just deploy and activate. Focus on managing the system, not writing code.continuously.

Stay in Control

Centralized monitoring and historical tracking
Stay on top of system health, performance, and trends.

Unified Oversight
Monitor all Agresso instances from a single pane of glass—see trends and status across your environments.

Historical Job Tracking
Understand when issues started, how often they occur, and what impact they have.

Minimize Risk
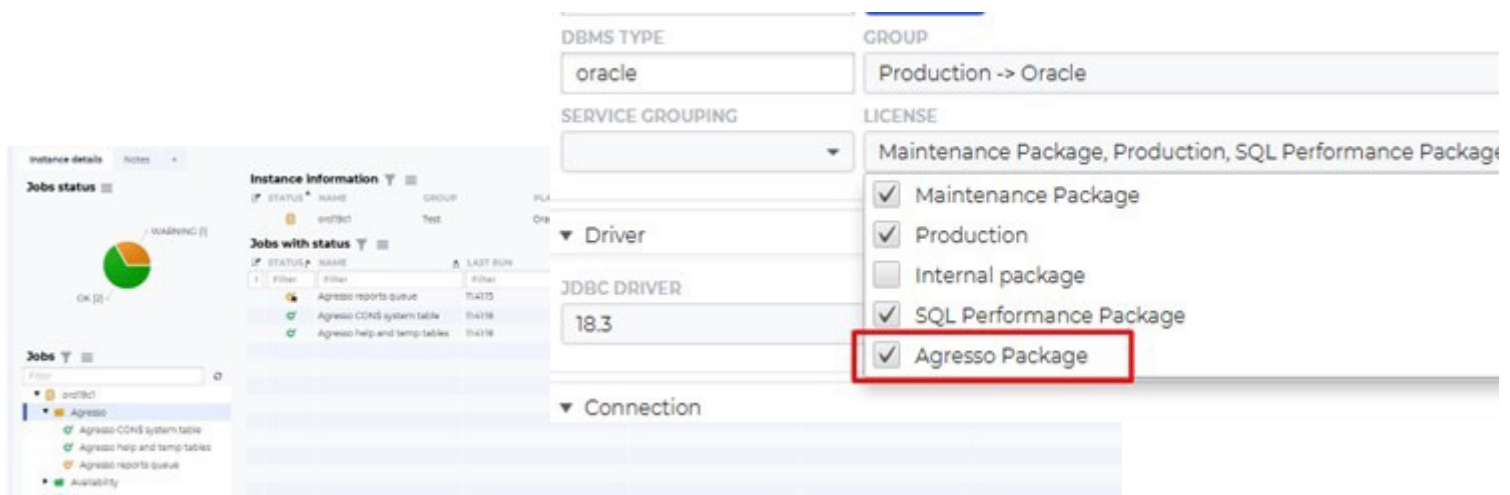

Detect Failures Instantly
Failures in exports, imports, and scheduler tasks are detected and reported in real-time.

Prevent Data Stoppage
Keep business processes running by ensuring data flows smoothly between sys-tems via Agresso interfaces.

Avoid Blind Spots
Built-in checks for key Agresso mechanisms eliminate monitoring gaps and ensure no issue goes unnoticed.
